**REPORT 4**  
*(1215/52/IM)*

## **TEN YEAR IMPLEMENTATION PLAN FOR THE OPEN SPACE ACCESS PLAN**

---

### **1. Purpose**

The Strategy and Policy Committee considered the Ten Year Implementation Plan for the Open Space Access Plan on 15 June 2006 and resolved to lie the report on the table and re-consider the report as part of the 2007/08 draft annual plan process.

The report provided a number of service level options of which scenario 3 was recommended in the report. At the councillor workshop of 14 February 2007 in response to questions, scenario 1 was identified as the recommended option in conflict to the paper. To clarify officers' position on this report, it is recommended that scenario 3 be agreed. This scenario allows Council to allocate an appropriate level of funding to ensure the life of the existing asset is extended within the next ten years as well as achieving new track links over twenty years.

The original report is appended.
