

The background of the top half of the page is a vibrant, abstract composition. It features a dense field of thin, glowing lines in shades of orange, red, and yellow, creating a sense of motion and energy. In the center, there is a rectangular inset showing a blurred view of a cityscape or a large window with multiple panes. The overall color palette is dominated by warm, fiery tones.

Our work in detail

This section contains our statements of service performance and detailed commentary about what we did in each of our seven strategy areas.

Our reporting is comprehensive. For each area you'll find:

- what we did
- what it cost
- whether we met budget
- whether we met our performance targets.

We keep all of this information together, which means that for each strategy you will get the full picture about how we are performing.

All of our work aims to contribute to the long-term goals or "outcomes" we want for the city. Each chapter is arranged so you can clearly see what those outcomes are, progress towards those outcomes, and how our work contributes.

The performance measures you will see here were signed off by the Council as part of the 2006-16 long-term plan. We get performance information from a wide variety of sources, including an annual survey of Wellington residents.

Our measures and financial results are independently scrutinised by Audit New Zealand.

RESIDENT SURVEY

We commission a resident survey to find out what Wellingtonians think of the city and our services and facilities. This report uses information from our February 2008 survey, conducted by independent research company ACNielsen. The sample, of 600 residents aged over 15, was representative of the Wellington population in terms of ward, age and gender. The maximum margin of error is +/-3.98 percent.

FINANCIAL REPORTING

The net costs referred to in the 'what it cost' tables include both direct and indirect costs. Direct costs can be directly attributed to the activity. Indirect costs include things like staff time, office space and information technology costs which relate to the overall costs of running the organisation. These indirect costs are allocated as overheads across all activities.
